RAHUL PRANASSERI · UNREAL ENGINE 5

LEVEL DESIGN: HOW IT WORKS

PROCESS

1. You send the brief: genre, UE version, goal of the level, references
2. I plan the layout on a paper map and share it with you
3. I build the greybox in engine and we adjust scale and flow
4. Dressing, lighting and optimisation (Standard and Premium) and final delivery of the packaged UE5 project

WHAT I NEED FROM YOU

- ✓ Game genre and camera
- ✓ Unreal Engine version
- ✓ What the player does in the level
- ✓ Rough size and playtime
- ✓ References or a mood board
- ✓ Asset source: yours, Fab/Megascans, or greybox only

PACKAGES
